WiseHIC

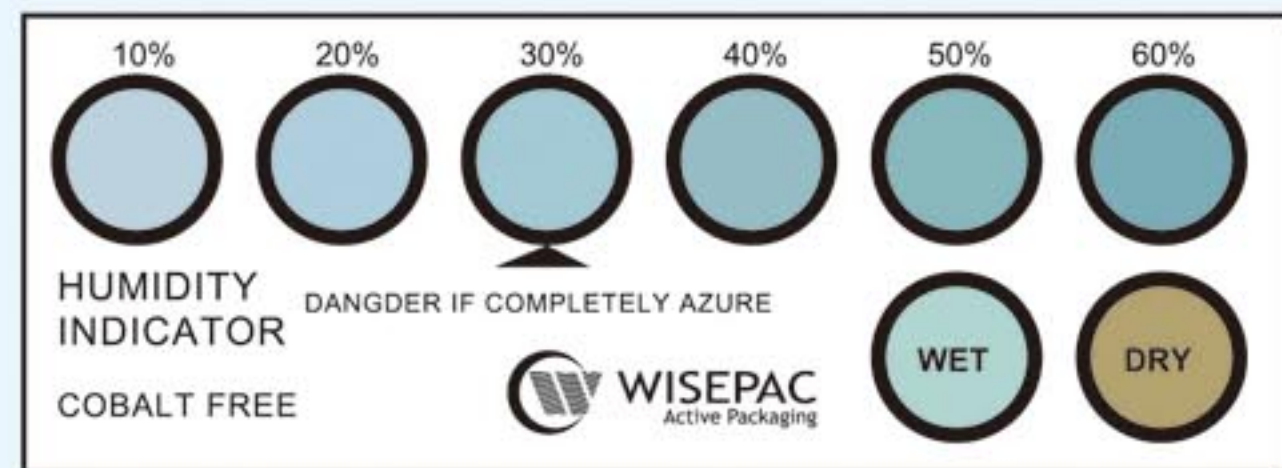

Humidity Indicator Card

Wisehic Humidity Indicator Card is a kind of accurate and convenient humidity testing means, through the color change of the indicating dots on the card, it is easy to clearly observe the relative humidity inside the current packaging. It is not only simple in operation, but also low in cost, making it an important auxiliary tool for moisture proof packaging. Wisepac has developed varieties of humidity indicators in three major categories: cobalt series humidity indicator, copper series humidity indicator, and iron series humidity indicator, which can meet the needs of humidity indication on different occasions and under different environment.

If the color the indicating dot changes from brown to azure, the relative humidity in the air reaches or becomes higher than the value printed on the indicating dots.

Color before change

Color after change

Wisehic Indicator Color Change Reference

Color Change of indicating Dots	Relative Humidity													
	5%	10%	15%	20%	25%	30%	35%	40%	45%	50%	55%	55%	60%
